

CALL FOR THE SELECTION OF TEMPORARY RESEARCH PERSONNEL TO CARRY OUT SPECIFIC SCIENTIFIC AND TECHNICAL RESEARCH PROJECTS.

The COIE is requested to make a public call for the selection of temporary research personnel to carry out specific scientific and technical research projects to be funded, in accordance with the following:

RULES

FIRST.- PURPOSE OF THE CALL

The purpose of the call is the selection of research personnel (No. of post offered 1), to carry out the Project 'PID2020-113887GB-I00 (DESIGN OF MINIMAL ENERGY SEQUENCES)', whose principal investigator is Mr / Mrs. Carlos Beltran Alvarez of the department / institute Dpto. Matemáticas, Estadística y Computación and its funding will be covered by the budget application 21.B668.64320 corresponding to the following modality Plan Estatal de Investigación

SECOND.- FUNCTIONS AND TASKS OF THE POSITION

It is hoped to recruit a person who can help with a specific problem of the project, namely the placement of points on the sphere of dimension 3, in order to optimise the value of the logarithmic energy, using techniques that generalise those tested so far by the members of the Carlos Beltrán and Ujué Etayo work team. This is work which, due to its nature, could be carried out by a university graduate without excessive experience, considering that the time dedicated to it by the person to be hired will result in greater availability of the members of the work team in other more demanding areas of the project which require a great deal of time and effort from the researcher in the coming months. We consider that these results must be achieved as soon as possible and that the use of the contract modality for special production circumstances is therefore justified.
